PART 3 - P&PD PLANNING COPY

### **General Information**

- 1. Form 70D must be used when ordering copy reproduction work from the P&PD Bindery and Reprographic Center. All other printing and photography requests should be forwarded to the Main Printing Plant, Room 154 or G-67 for processing.
- 2. P&PD production policy limits reproduction to no more than 125 copies per document, consequently requests that exceed this limit should be routed to the Main Printing Plant for processing on Form 70.
- 3. Printing, photography, and copy center requests submitted to any P&PD component must be accompanied by the proper form for the type work requested and have both an authorized signature and a requisition number that identifies the component for which the work is being done.

#### **Instructions:**

The 70D requisition has two separate parts. Part I is general information that identifies the requesting component and production time frames; however, components in the FIR program will fill in only the shaded blocks. Part II is for the FIR Program only.

#### Part I

All Copy Center customers, except FIR/DDO components, should furnish basic information requested in items 1 thru 13. Those components in the FIR Program will fill in the shaded areas only.

#### Part II

This section is for those offices in the FIR Program.

- 1. Instructions for copying reports should be written clearly and concisely; one report per line that lists the number of pages in the report.
- 2. If possible, all similar classifications should be on the same manifest: for example, all FIR-LT's listed together, all FIR-DB's together, all OO-B's together, all OO-T's together, etc.

#### INTRODUCTION

- 1. This Emergency Manual is intended to provide Office of Logistics personnel essential guidance and appropriate contact information needed in handling situations covering natural, special, personnel, and building emergencies.
- 2. The key to the use of this Emergency Manual is the Emergency Matrix (Blue Tab). It identifies emergencies generically and specifies the immediate actions that should be taken in response.
- 3. Behind each White Tab is the essential guidance needed in handling such special operations as weather emergencies, emergency action during nonduty hours, OL crisis support, and building emergencies.
- 4. Lists of emergency contacts for GSA-leased and direct-leased Agency-occupied buildings in the Metropolitan Washington Area may be found behind the Red Tabs.
- 5. Behind the Green Tabs is additional information on each Agency-occupied building in the Metropolitan Washington Area.

### EMERGENCY CONTACTS

- 1. The following are emergency contacts to be called in response to certain emergencies. They are not necessarily listed in priority order. Individual judgment and discretion must be exercised in calling the contacts and in performing and expanding on the emergency actions outlined under the White Tabs.
- 2. <u>During normal duty hours</u>, in general, take all actions indicated under the White Tabs, at the time of the emergency unless otherwise noted.
- 3. <u>During nonduty hours</u>, see Emergency Action during Nonduty Hours (White Tab 2) in addition to the specific emergency procedures listed under the other White Tabs.

### EMERGENCY SUPPLIES

OL/FMD has arranged to support 1,000 people with cots, blankets, disposable linens, and long-range patrol rations for a 4-day period. The supplies will be kept in locked boxes under the jurisdiction of the Building Services Branch (BSB), OL/FMD, and distributed as necessary in emergency situations.
